

OUTSIDE STORAGE OF TIRES

PERMITS AND PLANS:

An operational permit is required to establish, conduct or maintain storage of scrap tires and tire byproducts that exceeds 2,500 cubic feet of total volume of scrap tires and for indoor storage of tires and tire byproducts.

A plan showing location and dimensions of tire storage area, tire piles, buildings, aisles and access roads shall be submitted with applications for tire storage permits.

OUTSIDE STORAGE OF TIRES:

Individual piles:

Tire storage shall be restricted to individual piles not exceeding 5000 Sq. Ft. of continuous area. Piles shall not exceed 50,000 cubic feet in volume or 10 feet in height.

Separation of piles:

Individual tire storage piles shall be separated from other piles of salvage or other piles of stored product by a clear space of at least 40 feet.

Distance from lot lines and buildings:

Tire storage piles shall be located at least 50 feet from lot lines and buildings.

Fire breaks:

Storage yards shall be maintained free from combustible ground vegetation for a distance of 40 feet from the stored material to grass and weeds; and for a distance of 100 feet from the stored product to brush and forested areas.
